Tattoo And Body Piercing Shop In Calgary Now Offers Custom Tattoos

September 16, 2015

September 16, 2015 -
Jokers Tattoo & Body F/X, which is based in Calgary, AB, Canada, has announced that they now specialize in custom tattoos. The custom tattoo service provided includes such things as sketches, photographs, books and so on. The tattoo and body piercing shop now caters those who want to have their own unique and personal kind of tattoo.

"While we offer a range of conventional designs, we really want to encourage people to opt for custom designs instead," says Boden Alfons from Jokers Tattoo & Body F/X. "We specialize in creating these personal images, giving people a unique tattoo that is exactly what they want. People can either call us for a booking, or they can just walk in and have a chat with one of our specialist artists."

The creations made by Jokers Tattoo can be considered as works of art. They include lifelike portraits, which are some of the hardest tattoos to complete. Complete portraits include not just people, but also people's favorite pets, for instance. Additionally, they offer tattoos in different styles, including solids, colored tattoos, shaded tattoos, and more.

For Jokers Tattoo, tattoos are true works of art and they are treated as such. Each artist employed in the studio takes tremendous pride in their work, and they are true perfectionists. This is something that their clients have appreciated as well. "I will never go to any tattoo artist except Boden," says Charlotte Von. "He is hands down the best artist I've ever been to. He takes my ideas and makes them extraordinary. I will refer anyone to him that wants a tattoo. I trust him with tattooing and the atmosphere at the shop is awesome and everyone is so friendly and welcoming. Love it there! Thanks!!"

Tattoos are becoming increasingly popular nowadays. While there have always been fashions in terms of styles, Jokers Tattoo & Body F/X wants to move away from fashion and create designs that people will love for the rest of their life. A tattoo, after all, is a permanent work of art and not something that can change as often as the seasons.
