Sunshades For Babies Are One Shade Darker Than Most Brands, Announces 3 Bees and Me

September 25, 2015

September 25, 2015 - PRESSADVANTAGE -

3 Bees and Me proudly shared to everyone earlier that their sunshades for babies are a shade darker than most brands. The company wanted a product that will stand out from the rest. In lieu of this, the shade they released is not only darker than most competitors, but it also sports a cute dog design that is specifically targeted for babies and kids.

?In our company, uniqueness is very important. Because of this, with every product that we release, we make sure that it will stand out from the rest?, says Holly James, 3 Bees and Me representative. ?For our very unique and highly popular sunshade for cars, we made it a shade or two darker. We believe that this is important to ensure that the glaring rays of the sun will not be uncomfortable for the passengers. It is also not too dark for safe-driving.?

As seen on the product reviews, customers appreciate not only the design, but the shading as well. In a review by Will H., he wrote, ?Fantastic sun shades for your car. These are some of the nicest ones I have used. We were using those vinyl tint style ones but they always seemed to fall off when the car got warm or hot. They wouldn't attach to the windows. These don't have that problem at all. The suction cups on these

work well. Stick these up and they stay up, even when the car gets ridiculously hot from being parked. My toddler son loved the puppy on them. He just learned to say puppy, so they make him laugh when he sees them. I enjoy them, because he enjoys them. These are dark enough to keep the blazing sun off of him, but not so overly dark you cannot see out the window if need be. Both of ours cars have dark tinted windows, but we wanted something extra to help keep the sun from pestering him while he rode in his car seat or slept in it. We use them in both our minivan and car and even at night there is still visibility with them. Even with the dark tint, no issues seeing out.?

As mentioned earlier, the 3 Bees and Me car shades are made of nylon mesh screen that is a shade or two darker than most brands found in the market today. It boasts a unique dog design that is perfect when driving with kids. Each set comes with two shades and two extra suction cups that are free of charge. The actual size of the shade is 17 x 14 inches and will fit most cars and SUVs. It is very easy to fold when not in use.

When it comes to shades for cars, the degree of tint is important. The shade should be dark enough to protect the passengers from the sun while also allowing enough light to pass through for safe driving. This is what 3 Bees and Me achieved for their product, which is still available at http://www.amazon.com/gp/product/B00X32B9IY.
