Natural Puppy Dog Shampoo Helps Protect Its Sensitive Skin

November 01, 2016

November 01, 2016 -

Puppies' skin is much thinner and more sensitive than that of an adult dog, and particularly than that of a human. Hence, it is important to use a shampoo that has been specifically designed for these animals. Healthy Clean Pet, a pet care company in Tuscon, AZ, has developed a hypoallergenic puppy shampoo, made up solely of natural ingredients. It is currently available on Amazon at https://www.amazon.com/Puppy-Dog-Shampoo-Natural-Hypoallergenic/dp/B00T3EO578, where it is a best selling item.

Healthy Clean Pet's Gustavo Guerra says: "Shampoo that has been formulated for human skin is too harsh for a pet. A lot of dog owners ask whether they can use baby shampoo instead, but this is actually not a good idea. The formulation for human and animal skin is incredibly different. We recommend the use of a specially formulated, hypoallergenic shampoo made up solely of natural ingredients."

Health Clean Pet has released information on their website at https://healthycleanpet.com/ about the differences between human and animal skin. They highlight the difference in pH balance, with animal skin being much less acidic. Furthermore, dogs have different skin problems when compared to humans, which is

why their shampoo should contain different ingredients that address these specific problems.

"Using human shampoo in dogs can lead to dryness and irritation on your pet," adds Gustavo Guerra. "If the shampoo makes the skin feel dry, the dog will start scratching at its skin, creating abrasions in which bacteria can grow, causing infections. Never use a human shampoo to wash your dog, because you will cause serious damage to the skin of your pet."

The recommendation is to only use shampoo that has been specifically formulated for pets, using natural ingredients only. This helps to protect and moisturize a dog's skin. This is particularly important for puppies, whose skin is even more sensitive. A hypoallergenic shampoo designed for puppies, therefore, is the best option.

Healthy Clean Pet has also released a YouTube channel at https://www.youtube.com/channel/UCQ7Igh0YsPgfBpvLcRS0tBg, where they frequently upload new videos to provide people with advice, information, and guidance on how to properly look after the health, skin, and overall well being of their pets.
