

Phoenix AZ Firm Celebrates Five Years of Online Marketing Services

November 28, 2016

Majestic Warrior offers top-tier online marketing services for small to mid-sized business in and around Phoenix, Arizona. The team uses best SEO practices to help businesses expand exposure and market share.

Phoenix AZ: [Majestic Warrior](#) and principal, Shannon Adams, are pleased to announce that they have reached the five year business milestone. The specialization services offered by the team include market share and market presence in the niche. Several strategies to boost the brand and reputation at the same time are employed. The focus of the team allows for national SEO, local SEO and lead generation programs. The experience in the online marketing business and the process of optimizing the website while building a social presence, reputation and brand make the team well-recognized by small and medium-sized businesses.

The website includes articles in the [Majestic Warrior Blog](#). The blog posts are focused on supplying resources and content which will help to grow the client's business. Also available are a variety of news topics such as Google updates on timely enhancements and revisions. Panda, Penguin and Phantom are examples. The professional team has successfully brought back sites affected by updates from Google.

According to Shannon Adams, speaking in a recent interview, "Depending on the severity of the penalty we have recommended either trying to fix the site with on-page optimization, proper brand link building and or even starting a new website. We provide services, tips and recommendations to help your business become more successful. If you are looking for a custom website design, template design, landing page or even a micro site, we can provide expert solutions to get the work done."

The [services page](#) describes the three step process which begins with an analysis of the current website. Adjustments using proper on-page optimization techniques are utilized to help the website perform better online. The second step includes building a brand network to support an enhanced reputation, as well as an off-page optimization program. The third step is the process of building high quality industry-related links using content marketing, both to the website and the brand network.
