

## **DIY Shelf Kits Allow Customers To Turn Kitchen Cabinets Into Drawers**

*January 03, 2017*

January 03, 2017 - PRESSADVANTAGE -

A business based from Florida, USA called Miracle Shelves is a new storage solution company that launched on January second, 2017. By the time of this release the company has already been featured on HomeTalk, Houzz and Archilovers.

The fact that the product line is DIY shelving kits is why the launch is greatly anticipated, explains the company's co-founder: "Miracle Shelves are pull out shelves that have been crafted from high quality Baltic Birch, and for protection, they have baked on lacquer. All of the do-it-yourself kits we produce include steel rails of industrial quality making the bottom mounting of these custom pull-outs and on to the current cabinet, much easier," explains RJ Shaw.

The included steel rails hold up to one hundred pounds of weight. They allow customers to take full advantage of every inch of storage space. The launch has us really excited; we are pleased to see the interest that people already have in them.

These Miracle Shelves are designed for all skill levels. Customers can customize each unit to fit into current

bathroom or kitchen storage spaces. A DIY installation video has also been created by the company; it can now be viewed on YouTube. In the video, complete instructions are provided on how the kits work and the content shows exactly how they are fitted.

A lot of work has gone into this product by the company and they stand behind its efficacy and quality. RJ Shaw added, "Thanks to our refund and returns policy, DIYers are guaranteed complete satisfaction. Our premium slide out shelves are custom made for ease of installation. We thoroughly inspect each kit.

As explained on the LinkedIn page for Pullout Miracle Shelves, RJ Shaw is the co-founder of the company. In his bio he has made his passion and dedication clear. He is also vastly experienced in the world of shelving and DIY; this is how he was able to develop a product that he feels is so unique.
