Protiga Group Launches Blackhead Extractor Kit On Amazon

April 03, 2017

April 03, 2017 -
Walnut, California based company, Protiga Group, has recently launched a new product onto the Amazon marketplace. The company's Blackhead Extractor Kit is now available through the marketplace.

Sarah Dykes with Protiga Group says, "Popping pimples and squeezing blackheads can leave permanent damage to the skin. Our blackhead extractor kit is recommended for safe removal of these blemishes."

The product, which can be seen at http://amzn.to/2hNJdP2, is made of stainless steel which makes it rust resistant. According to Sarah Dykes that the blackhead extractor kit comes with five dermatologist grade, double-ended tools to get rid all blackheads, whiteheads, acnes, and zits or pimples.

"Women are going to find that this blackhead extractor kit is super easy to use. It can reach difficult corners around the face and body and is designed with anti-slip handles for a better grip. It can also help prevent allergic reactions, infections, skin redness, and scars, by providing a sterile and safe way to remove blackheads and pimples," Sarah Dykes States.

Sarah Dykes states that the blackhead extractor kit comes in a portable, stylish, and well-constructed metal case.

Protiga Group designed the Blackhead Extractor Kit to be a DIY in-home facial treatment for a clearer and healthier skin. The company states that their new product is a better and safer solution for removing skin impurities. More can be seen on the company's Amazon seller's page.
