

# Bigfoot Pest Control Services Area Expands To Chicago and Surroundings

*May 08, 2017*

May 08, 2017 -

Bigfoot Pest Control offers exterminator and pest control services throughout Chicago, Schaumburg, Elk Grove Village, Rosell and Hinsdale. The firm is locally owned and operated with the same ownership for a quarter century.

Itasca IL: Bigfoot Pest Control is pleased to announce that they offer pest control and exterminator services in Chicago, Schaumburg, Elk Grove Village, Roselle and Hinsdale areas. The service area includes Arlington Heights, Des Plaines, Elgin and Wheaton as well as others. The locally owned and operated pest control company has had the same ownership for more than 25 years. Customers get effective, safe, eco-friendly and low toxicity pest control methods, which are safe for children and pets. The positive response from customers is excellent.

The Yelp pest control category listings and reviews are unfailingly positive. The extermination services extend to insects and rodents, including mice, bed bugs and roaches, each of which are removed quickly. The firm

does termite inspections as well as extermination. Bigfoot provides effective, safe, eco-friendly and low-toxicity pest control methods which are safe for children and pets. The safety and peace of mind for customers is a priority.

Speaking for the firm, Christ explained to an interviewer, ?Our pest control technicians are licensed, certified and experienced. We get great reviews because we go the extra mile for our clients. We take proactive measures. We use pest control methods aimed to prevent pests from returning, as well as preventing a variety of other pests from infesting your home or business. Our exterminators are experts committed to solving your pest control problems efficiently and never allowing danger to come to you, your clients, or your loved ones.?

?We have a wide variety of tools and chemicals available only to pest control companies with licensed exterminators in and around Chicago,? he continues. ?We bring only the best and highest quality, every time.?

The exterminators can perform a bedbug inspection to determine if the varmints are present. The insects are dirty, disease carrying and smelly creatures that are a growing problem in the area. The team at Bigfoot Pest Control can find and eliminate infestations.
