

QVS Tech Launches New Website to Highlight Oscillators and Quartz Crystals

September 08, 2017

Carlsbad, California based company [QVS Tech, Inc.](#) has recently announced the launch of its new website. This woman owned small business has been providing frequency control products to businesses for more than 15 years, and a representative for the company has announced that the site is now live and can be visited by those who are interested in oscillators and quartz crystals – both SMD and Thru-Hole packages.

Alicia Scaglione, National Sales Manager of QVS Tech says, "We thought that it was time to regroup and make a larger digital presence, which is why we had a brand-new website developed. We wanted to put information out there about our company and our products, on a fresh, new platform. We think this website is more user friendly and those who need us can find us much more easily."

Scaglione points out that the company has, over the past 15 years, developed the reputation for providing the utmost in quality products and services, as well as fast deliveries. They provide products for ISO9001 certified offshore manufacturing facilities, such as clock oscillators, quartz crystals, TCXO, OCXO, VCXO oscillators, and others for custom and standard frequencies. She states that those interested in learning more about what the company offers can [view their Facebook page](#).

"We place strong emphasis on quality, value and service," says Scaglione. "That's what our name suggests and it's what we live by. We want you to find the products that you need and know that they are the highest possible quality when you receive them."

QVS Tech provides products for markets that include medical, aerospace, telecommunications, testing and other similar facilities. Engineers are available to answer questions and offer design assistance for applications as well. Scaglione says that the new website is designed to provide customers with all of the information that they need about the company and the services and products that they provide, as well as their manufacturing processes and credentials. Those interested in learning more can [contact QVS Tech](#) for more information or to receive a quote.
