

DuoCircle Launches New Phishing Protection Service

March 08, 2018

DuoCircle LLC, Announces the Release of Advanced Threat Defense with Phishing Protection
A cost-effective, multi-layered approach to mitigating Spam, Malware and Phishing in Corporate Email.

Today DuoCircle LLC, announces the launch of their latest product, DuoCircle [Advanced Threat Defense](#) with [Phishing Protection](#). Advanced Threat Defense offers cloud-based cybersecurity protection against malicious links in emails, spam, malware and business compromise email. Advanced Threat Defense provides real-time, layered protection for any email server hosted on-premise or in the cloud.

Brad Slavin, CEO of DuoCircle says: "We pride ourselves on bringing high-performance email services to our customers at an extremely affordable price. Our new Advanced Threat Defense is a layered approach to email security which includes our signature perimeter spam and malware protection combined with real-time phishing protection."

The Phishing Protection service provides a way for businesses to block access to malicious websites in emails. The phishing protection service checks multiple reputation databases in real time to protect end users on their computers, web browsers or cell phones.

Slavin adds: "If you are familiar with Office 365 Advanced Threat Protection, Mimecast Targeted Threat Protection, and Proofpoint Ransomware & Targeted Attack Protection you'll understand the need for these types of services. We are here to bring this powerful protection to smaller businesses at a fixed cost."

While competitive products bill based on the number of users or email volume, DuoCircle charges a simple, flat fee based on the features a business needs. Making the DuoCircle Advanced Threat Defense service especially advantageous from a pricing perspective for businesses of all sizes, but especially so for medium and larger enterprises.

To learn more about Advanced Threat Defense with Phishing Protection visit duocircle.com or contact DuoCircle.
