

# Roof Repair In Manassas VA Receives 5 Star Review

August 08, 2018

Roofer 911, a roofing business based in McLean, VA, is proud to announce that they have received a new glowing review from a happy customer in Manassas. To show their appreciation for the customer's review, they have transformed it into a showcase video. The video, which went live on August 4, 2018, can be viewed at <https://www.youtube.com/watch?v=dgxRJwpdpFI>.

In the review, customer Gargi Patel expresses how happy they were with the roof repair service provided for their home in Manassas, VA. They wanted to share their experience with others. Gargi says: "Great customer service. Everything done on timely manner and very professional staff. Highly recommend Roofer 911."

The review clearly highlights everything that the company stands for, which is a professional, reliable service with fair prices. They are happy that their customer was so pleased with the work that was done. The company also ensures that they send out proposals for roof replacements when such are needed, within 72 hours of a request being put forward. Additionally, they always keep customers up to date with any delays, such as the current ones caused by a backlog of emergencies in the area as a result of freak weather.

As shown on the company's website at <http://www.roofer911.com/roof-repair/prince-william-county-va/manassas.htm>, Manassas is just one of the areas that they cover. Manassas is home to around 40,000 households and is a town full of history, particularly relating to the Civil War. Summer months are hot and humid, but winters are quite cool, including freezing temperatures. These weather extremes have an impact on roofing structures, which means homeowners must be mindful of any necessary roof repairs and replacements.

Indeed, it is impossible to escape the ravages of nature and time. Because of the weather, roofs contract and expand several times each year, often leading to loose shingles. Additionally, the natural elements such as sun, rain, wind, and snow can cause roofing materials to be damaged and require replacement. This is completely normal and Roofer 911 is committed to being an educational resource for homeowners in the area, including the Manassas community, to ensure that they know when to have their roofs repaired, thereby avoiding costly replacements. Should there be a more serious issue, such as water entering the property, the company can schedule an emergency appointment.

People are encouraged to understand how important it is to be mindful of the dangers of a leaking roof. It can lead to weakening and rot in any wooden structures, cause mildew and mold to grow, wet the insulation and thereby increase energy costs, lead to health concerns, cause paint to peel and drywalls to break apart, lead to electrical short circuits, destroy carpets, and generally cause a lot of discomfort. All of that can be avoided with timely repairs.

Roofer 911 also encourages people to have regular inspections done for their roof as it is quite

possible that damage is being done inside the structures of the home, where it can be undetected for quite some time. They will be happy to come in and determine whether any leaks are present and find appropriate solutions before the issues become worse.

The company's commitment to a fair and honest service has not gone unnoticed. Indeed, as can be seen from their Google Maps page at <https://goo.gl/maps/m3w2m9SmEj52>, they have received hundreds of positive reviews and continue to rank as a 4.9 star company. That is because they guarantee to always be honest with their clients and offer a transparent pricing structure at all times. They are there to help homeowners whose roofs have become damaged and to find solutions that work for everybody.

A home investment is significant and one of the most expensive parts of any home is its roof. Roofer 911 therefore recommends that people schedule a regular and annual inspection of the structure, thereby ensuring that problems are identified before they escalate and cause any serious damage. Roofer 911 has some of the most advanced equipment available to determine whether leaks are present and the damage that can be caused. They are also happy to work with those who need to file an insurance claim as a result of roof damage.

All Roofer 911 employees are fully licensed and insured to perform their work. This guarantees that the job will always be done up to standard. The company also guarantees the satisfaction of customers, ensuring that the job isn't finished until the customer is completely happy with the result. Their numerous reviews attesting to this attention to detail speak for themselves and demonstrate the professionalism customers can expect.
