Carrie C. gave this 5-star review: “The whole Prodigy Chiro Care and Spinal Rehab team is great, from the front office to the doctors. They help you feel right at home, and help you find the right treatment plan for your individual needs. As a dancer and generally active person, spinal health is really important for my happiness! After years of physical wear and tear, I developed lower back and neck pain. I was at a point where simply sitting hurt my back, but my final straw was when I couldn’t sneeze without pain. At this point, I found a team I could trust, at Prodigy, who helped me get my mobility back! Healing takes time, but sticking with it has paid off. The office is conveniently located in Culver City right near the 405 and has plenty of street parking in its front and side streets.”

“Prodigy Chiro Care & Spinal Rehab – Culver City are determined to be the best healthcare partner to

all our clients on the road to a happy and active lifestyle,” said Dr. Rodriguez. “We encourage you to learn even more about us by following us on social media.”

Scott S. had this positive review to share: “Dr. Rodriguez works magic. I was about as skeptical as one could be about seeing a chiropractor, as I questioned how an avid and longtime athlete in many traditional and active sports couldn't just go get a deep tissue massage, and stretch more often. Well, the massages and stretching and yoga didn't come close to relieving what I was experiencing; a new extremely high level of sharp pain on top of chronic constrained motion in the neck and back (due to a combination of new and old body jarring events). E-stim, heat packs, and Dr. Rodriguez opening up my neck and realigning my displaced rib turned out to be the key to my recovery. I can't thank the doctor enough, for what I'm going to say is an incredible change in my daily life. I can now go back to all my heavy workout activities and know that when I feel misaligned, I have a dependable person that I can trust to help out. It's incredibly reassuring to know that I can trust his findings and go with his guidance. I was at the end of my rope (pain 8-9 on a scale of 1-10), and he brought me back.”
