

New Quiet Stapler By EcoElectronix Takes Amazon Customers By Surprise

February 07, 2019

Positive reviews and feedback have been flowing nonstop for a small Amazon based company that specializes in providing advanced and compact [office and desk supplies](#). One of their best selling products is the EX-25 electric stapler that delivers a powerful performance in a small, portable, and sleek design.

Amazon shoppers who have already purchased the EX-25 have been leaving 5-star reviews outlining what they enjoy about the stapler. The company, EcoElectronix has over 900 reviews from customers who can't get enough of the high-quality stapler.

After receiving their stapler, an Amazon customer wrote, "I just ordered my electric stapler. It came in one day and was exactly as described. I have registered it and got immediate feedback on my Lifetime Replacement Warranty. It doesn't get any better than that. I wanted to be able to plug it in rather than be replacing batteries and this item gives me both options. Some other great features are the long electrical cord, and the ability to adjust how far down the page you want it to place the staple. I think I got the [best stapler](#) for the price."

With every purchase, EcoElectronix owner Seth Allen promises a lifetime warranty. If for some reason the stapler breaks, is defective or damaged, the company will replace it with a brand new one without any hassle. The EX-25 offers two power options, users can use the adapter and plug the stapler into an outlet, or they can use batteries. The multi-power options allow the user to bring the stapler with them on-the-go or use in small areas with no outlets.

Another customer stated trying many different electric staplers but enjoying the EX-25 the most. "I have used electric staplers for decades. Most of the ones I've had are much noisier than the EcoElectronix EX-25. When in an office environment with other nearby, that's a definite plus. I haven't had this particular brand or model of stapler before, and, frankly, I haven't had this one that long. But I've used the hell out of it and I'm very pleased with its performance. I wouldn't hesitate to suggest it to anyone needing a quiet workhorse of a stapler. Buy it and don't look back."

Although the EX-25 can staple up to 25 sheets of paper, it is said to be extremely quiet, making it ideal for quiet environments such as offices and schools. The stapler can be purchased in both black and white and offers a modern design that looks stylish on any desk. To purchase the EX-25 readers can visit Amazon.com where it is available for \$39.73 and with free two-day shipping for Prime members.
