

# Rockwell Trading Simplifies Trading Strategies with Power X Optimizer

July 30, 2019

Rockwell Trading is pleased to announce they are simplifying trading strategies with their [PowerX Optimizer](#) software, which is designed to function as a trading assistant. Trading is easier to approach when one has all the right tools, and the PowerX Optimizer is designed to be the right tool one needs to make trading a simple and easy endeavor.

In order to be an effective trader, one must know how and when to enter or exit a trade. This takes skill and knowledge that is developed over multiple years, as well as a natural sense of the ins and outs of trading. As Rockwell Trading states, “Trading Futures, options on futures, and retail off-exchange foreign currency transactions involve substantial risk of loss and are not suitable for all investors. You should carefully consider whether trading is suitable for you in light of your circumstances, knowledge, and financial resources. You may lose all or more of your initial investment. The lower the day trade margin, the higher the leverage and riskier the trade. Leverage can work for you as well as against you; it magnifies gains as well as losses. Past performance is not necessarily indicative of future results.”

Not everyone has years of experience, however, and not everyone wants to spend years learning the ins and outs of trading or spend hours coming up with trade strategies that may not always be as effective as one might want them to be. PowerX Optimizer, however, levels the playing field so that trading is no longer the sole domain of experts with years of experience under their belt. With this innovative piece of software, learning when and how to enter a trade deal, and creating effective trade strategies, is possible even for newcomers to the industry.

Notably, PowerX Optimizer is also a powerful tool for seasoned veterans of the industry. While it allows those with less experience to create effective strategies and thus make a profit, the program simultaneously enables experienced traders to create strategies with an even greater degree of success than they would be able to achieve on their own. Using the program in concert with their own knowledge, experienced traders can add their own knowledge and experience to the simple, effective strategies provided by PowerX. This makes PowerX Optimizer an incredibly powerful tool for anyone in the trading industry, whether they are just starting out or are years deep in their trading career. It helps newcomers and veterans minimize losses while making the biggest profit possible.

Rockwell Trading offers demos of the PowerX Optimizer to familiarize traders with the software and show them exactly how powerful a tool it can be. The demo can be found online on Rockwell Trading’s website [My Trading Routine](#) and includes a free, 35-minute training video showing viewers exactly how Markus Heitkoetter, founder of Rockwell Trading, the successful financial guru in the video, picks a stock and then enters and exits a trade with either a profit or a loss. Watch more of Rockwell Trading’s videos online at the following link: [3 Basic Trading Tools for Success](#).

Rockwell Trading is a trading company that strives to help traders make profits and minimize losses.

Under the leadership of Markus Heitkoetter, who the company notes is a “revolutionary figure leading an underground movement against the “financial advisors” and the propaganda that they put out,” Rockwell Trading takes steps to educate traders in the methods they can make greater profits than they normally would. “Markus’ claim to fame is that he can teach anybody how to trade in 60 minutes or less. That’s how simple yet powerful Markus’ trading strategies are,” states Rockwell Trading. Heitkoetter’ book ‘The Complete Guide to Day Trading’ has already been downloaded by over 360,000 people, and started many of them on their journey to financial freedom. His latest book ‘The Simple Strategy’ has been on the bestseller’s list for three years, and he has appeared on a number of TV networks in both the United States and around the world.

“Markus is an honest and very enthusiastic teacher,” says a Facebook review of Heitkoetter and Rockwell Trading. “Always to the point and his messages and videos are very organized. Lots of information and software on the web site. It feels like you're talking to a friend. Students need to be patient and persistent and great results are just waiting around the corner!”

For help with becoming a successful trader and increasing profits, contact Rockwell Trading today. Heitkoetter's knowledge, along with the recently updated PowerX Optimizer software, will ensure that anyone committed to getting results as a trader will achieve the results they desire.
