

One Source Communications Opens Two New Centers To Meet The Rising Demand For Its Managed Security Services

September 06, 2019

Raleigh, NC and Greenville, N.C. — To meet the increasing demand for Managed Security Services (MSS), One Source Communications (One Source) announces the opening of two new centers —an Engineering Center and a Security Operations Center (SOC) — in downtown Raleigh, North Carolina, to expand its cybersecurity solutions for small and mid-sized enterprises. To support this growth, One Source has also hired 30 additional staff members in the last few months from the Research Triangle and expects it will follow a similar job growth trajectory in the near future. One Source has two other SOCs and SOC labs located in Greenville, North Carolina and Portland, Oregon.
