

# Restorative Medicine: IV Therapy in NYC Announces Partnership with Better Health Chiropractic, PC

November 21, 2019

Restorative Medicine: IV Therapy, based in New York, NY, has announced a trusted partnership with Better Health Chiropractic, PC. Restorative Medicine: IV Therapy is a provider of [IV therapy nutrition New York NY](#) services and was founded by Dr. Vladimir Alexeyenko, M.D. The practice is geared towards serving the needs of those who want a way to counteract the damage that stress and modern living have been causing. Dr. Alexeyenko wants to emphasize that people often work long hours at a desk, eat on the run, have disrupted sleep, and are exposed to environmental toxins. All of that stress can weaken the body's immune system and make it more difficult to fight off disease.

Dr. Vladimir Alexeyenko says, “We offer vitamin infusions, hydration IV therapy treatments, and other IV therapy solutions that will energize you and restore your body and mind. Our bodies need fuel, not just any fuel, but the right mix of vitamins, minerals, water, and hormones. The human form is a complex system that relies on many compounds to get up and go. There is a perfect balance that helps us feel great but, modern life, especially in urban areas, robs us of that balance.”

Dr. Vladimir Alexeyenko is a licensed physician who has developed IV infusion therapy using his in-depth knowledge regarding the human body and what it requires to be able to perform at peak efficiency. He wants to point out that he established Restorative Medicine: IV Therapy based on the philosophy that preventing disease is better than cure.

He says, “We can prescribe and administer any infusion that can restore your energy, increase your metabolism, rebalance levels of vitamins and minerals, and strengthen your immune system. You will see and feel the results immediately. At Restorative Medicine, your body will regain the ability to heal itself thanks to IV vitamin therapy and other IV drips that will revive your energy, restore cell function

as you go back to your vibrant and busy life.”

With nutrients, vitamins, minerals, and fluids being essential in helping the body function well and in flushing out toxins, these are provided in IV drips and booster form for preventative medicine. The treatments supervised by Dr. Alexeyenko can help in fighting disease, boosting energy levels, and strengthening the immune system. This allows patients to have more control over their health journey. However, this requires the guidance of an experienced physician like Dr. Alexeyenko.

Dr. Vladimir Alexeyenko also provides [IV ozone therapy New York NY](#) services. This is designed to get rid of viruses, toxins and infections from the body. Its purpose is to oxygenate the blood to create an aerobic environment, which is hostile to microbes that thrive on anaerobic metabolism. It should be noted that while ozone can be dangerous when inhaled, it is not harmful in the bloodstream. Ozone therapy may be used by people who frequently travel and breath recycled air. It may also help during the flu season as it may be able to boost the body’s immune system.

According to Dr. Alexeyenko, IV therapy may be able to provide long lasting vitality and bring back systemic balance to the human body. IV therapy has an advantage over supplements or pills because the latter are taken orally and are diluted during digestion. On the other hand, IV therapy allows the nutrients, vitamins and minerals to their work at the cellular level.

Dr. Vladimir Alexeyenko has been practicing medicine for more than 25 years. He has always sought to be up-to-date regarding the study and use of restorative, holistic treatments. He also prescribes modern medical treatments but his long term goal is to guide his patients into the use of conventional and integrative practices and treatments designed to prevent ill health.

Those interested in [IV therapy NYC](#) services can visit the Restorative Medicine: IV Therapy website or contact them on the phone or through email. They are open from Monday to Friday, 9:00 am to 6:00 pm. Saturdays and Sundays are by appointment only.
