

Positive Pest Management -- Top NYC Exterminator for 15 Years

September 15, 2014

September 15, 2014 - PRESSADVANTAGE -

Whitestone, NY -- Positive Pest Management, a first-rate, all-service pest control company, has been delivering top-notch customer service and professional pest control services in the New York City area for 15 years. Customers have given the company excellent ratings, as the pest management company uses safe, quality chemicals to rid of pests, with little effect on people, pets, and the eco-system.

Positive Pest Management has had loyal customers for over a decade. The company has built a strong client base of residential property owners, condominiums, hospitals, commercial establishments, apartment complexes, and more. Among the vermin Positive Pest Management eliminates are bird mites, fleas, termites, moths, rodents, and roaches.

In addition to the quality customer service, Positive Pest Management provides health- and eco-friendly products to exterminate insects and rodents efficiently. One product is Bora-Care, by the Nisus Corporation, a preventative termite treatment. Positive Pest Management also uses EcoSMART products; these pesticides have essential oils that make them 100 percent safe. According to the EcoSMART website, EcoSMART is also the only company that offers a full line of Environmental Protection Agency-exempt pesticides sold in the United States.

Other products used by Positive Pest Management are the Advance Termite Bait System and Phantom Termiticide. The Advance Termite Bait System delivers faster results than their older counterparts when dealing with termite colonies. According to the Phantom Termiticide website, Phantom Termiticide is New York's only undetectable termite control that is given in low doses to termites, and meets the state's environmental standards.

Positive Pest Management has also received accolades and recognition for its work. The Better Business Bureau (BBB) gave Positive Pest Management an A+ rating due to its ability to quickly resolve consumer complaints filed with the organization. The business has been registered with the BBB since 2008. The pest management company also has a five-star average rating from over 130 reviews on CustomerLobby.com.

Positive Pest Management is a member of many professional organizations that include the National Pest Management Association (NPMA), the New York State Pest Management Association (NYSPMA), the New York State Association for Food Protection (NYSAFP), and the Manhattan Chamber of Commerce (MCC).
