

Rockwell Trading Releases The Power X Strategy Book to Help Traders Using the PowerX Optimizer

December 19, 2019

Rockwell Trading Founder Markus Heitkoetter has announced that they have recently released [The PowerX Strategy](#) book to help traders look for the best stocks, while limiting their risk. A hardback copy of the book is available for free with people only needing to pay for S&H costs. Markus advises those who are interested in claiming the free hardback copy to get their copy as soon as possible because supplies are very limited.

Markus Heitkoetter says, "Implement The Power X Strategy to find the best stocks, while limiting your risk. You don't need any experience at all in finance, economics, etc. You just need my 3 simple rules built into the system...that's it! Remember that 90% of new traders lose 90% of their accounts in 90 days. With this book you'll learn how to easily avoid devastating losses using my disciplined approach and avoid being part of the statistic."

With "[The PowerX Strategy](#)," traders can also learn how even if they're wrong more than 50 percent of the time, they can still enjoy a substantial profit using the strategy. Markus clarified that they are giving away 200 free copies in order to start generating positive buzz around the book while also helping 200 people get close to their goal of financial freedom.

Meanwhile, people who have already tried using the Power X Optimizer strategy of Rockwell Trading have issued positive reviews. For example, one recent [PowerX Optimizer review](#) was provided by Lois, who said, "I have been learning and practicing trading techniques with the Rockwell group for about 2 years now. I loved learning the strategies for day trading futures, and they worked for me for a while. I do not trade them anymore. I do like the Power X Optimizer for picking stocks and options. It has helped me grow that account. I like that it helps me chose which stocks or options to purchase and optimal exits. I also have learned money management and that has really helped with cutting my losses and capturing gains. Being able to be in the group settings either live or virtually has been valuable as well because of the others questions and insights. I plan on being associated with the Rockwell group for a long time."

Markus explains that the PowerX Strategy is designed to be easy to learn, which means that even those who have no trading experience can learn and start trading. However, he suggests that people start with at least a \$10,000 account. Nevertheless, for those who don't have the amount, they can still get the book and start learning the strategy. They can hone their trading skills using a demo account.

Markus Heitkoetter had worked at IBM for 60 to 80 hours a week. He pointed out that while his lifestyle has been considered to be "glamorous," his work caused him to be separated most of the time from his family, friends, passions, and hobbies. He decided to resign from his work in 2002 in Germany and move to the US with just \$30,000 that he planned to use in trading. He decided to focus

on trading and after a number of years, he has managed to become a multimillionaire and he has been sharing his successful investing strategies to other traders and those who want to begin trading.

Those who want a lifestyle like Markus and who want to not only learn but experience "The PowerX Strategy" can register for a free event at <https://bootcamp.rockwelltrading.com/>. For any questions, contact Rockwell Trading at 512-337-1885 or via email at support@rockwelltrading.com.
