

Chem-Dry Provides Water Damage Cleanup Services In Park City, Utah

January 06, 2020

Utah based Chem-Dry of Park City is pleased to announce that they provide water damage cleanup services in Park City and the surrounding areas. More information about the company's water damage cleanup services can be found at the following link: [Water Damage Cleanup Park City Utah](#).

Daryl Olsen, a representative for Chem-Dry of Park City, says, "If your house has suffered excessive water damage, it can lead to a variety of problems for you, the most immediate of which is the fact that water damage can promote the growth of mold and bacteria, lowering your home's air quality. In the long term, it can also lead to cracks in your home's foundation that will slowly but surely eat away at your home's structural supports. Without a doubt, water damage will also damage your flooring, carpet, furniture and other possessions."

According to Chem-Dry of Park City, water damage restoration is the process of restoring a property back to its original condition after it has sustained water damage. The company says that there are no government regulations dictating procedures; however, two certifying bodies—the IICRC and the RIA—have recommended certain standards. Chem-Dry of Park City follows these standards on all of their water damage restoration projects to ensure that their clients get the best results.

Olsen says, "If you pride yourself on owning a safe and healthy home, water damage is not something you want to overlook. Whether it's a burst water heater or a leaky roof, they can all cause a lot of long-term problems because even the smallest of leaks can lead to mold growth, which can seriously impact your home's safety and your family's health."

Olsen asserts that Chem-Dry's professionally trained water damage restoration inspectors and technicians can easily detect the source of any water damage or leak. After the team discovers the source, they will go over the best possible solutions with the homeowners and help them figure out the best way to avoid any further damage to their property.

"Our mission is to help those in need during difficult times and provide a thorough service," says Olsen. "In addition to actually helping you with the water damage problems, our restoration experts will also help you deal with your insurance company. This is because they require notification within a reasonable period of time following the water damage event. Not knowing what to say, or saying the wrong thing, to your insurance company could result in your claim being denied, but you don't have to worry about that when you work with us."

In addition to excellent water damage cleanup services, Chem-Dry of Park City also provides the Utah community with a variety of other services. These include carpet cleaning, granite countertop restoration, pet urine removal treatments, rug cleaning, tile and grout cleaning, upholstery cleaning and more.

The excellent services provided by Chem-Dry of Park City has earned them an excellent reputation in their community. On the Google platform, the company has a rating of 4.5 out of 5 stars. In a recent 5-

Star review, Michelle Butler says, “They work hard and get good results. Love the Chem-Dry method. So safe and always does a great job of cleaning without leaving residue in the carpet to attract dirt again.”

In another review, Amy Day praises the company’s carpet cleaning services, saying, “These guys were amazing! My carpets have never looked so good! I have been debating whether I should replace them or not but, with Christmas coming, I decided to wait. I’m glad that I decided to get them cleaned instead. They look great and I saved money by not getting them replaced! I will for sure use them again!”

Those who want to learn more about Chem-Dry of Park City and the various services they provide can find more information on the company’s website. Additionally, the company encourages interested parties to get in touch with Daryl Olsen directly via email, phone, or the contact form on their website. Chem-Dry of Park City also maintains a presence on social media, including Facebook and Twitter, where they frequently post updates, share blog posts and interact with their clients.
