

A1 Fence LV Now Offering Commercial Dumpster Enclosure

May 27, 2020

Las Vegas, Nevada based [A1 Fence LV](#) is ready to begin providing commercial dumpster enclosures and associated services to local businesses and residential properties. The company reassures the community that the ongoing COVID-19 pandemic will not prevent them from safely offering these services.

Eli Maciel, owner of A1 Fence LV, says, "At A1 Fence LV, we take pride in delivering the same high quality work to every customer, regardless of how big or small the project is. We help businesses protect the public and anyone on their premises. When companies trust us to design and install our high quality dumpster enclosures to suit their needs, we know that they have their priorities right."

The need for businesses to maintain secured dumpster enclosures has never been higher due to the high prevalence of wildlife, which has taken advantage of the current lack of traffic to explore areas that they previously would have avoided. Reports of skunk, racoon and coyote sightings have increased in the past few months, and the first time a business owner discovers they have a problem may be when they stumble upon the mess left after a successful raid on their dumpster.

Having a well maintained dumpster that is functional yet unnoticeable is an advantage for any business' premises. Keeping the area clean for both regular and potential customers is also a key factor that helped A1 Fence LV determine that they would supply their clever and functional designs to local customers.

The company provides a range of [dumpster enclosure](#) designs that they are sure will suit everyone's needs, from single or double gate to a walk-in gate that is great for mixed-use access (including condos and apartments). Walk-in gate enclosures are also appropriate where ADA compliance is required. A1 Fence LV also offers multiple gated enclosures that are ideal for use in hospitals and large shopping centers as well as industrial facilities and trash and recycling combos.

A1 Fence LV can also provide galvanized steel and aluminum trash enclosures with fixed louver design that permit direct visual screening. Gates can be customized to suit a customer's preferences, and the options include swing gates, v-wheel roller gates and cantilever roller gates. With the right type of dumpster enclosure and an extremely effective protective coating system, businesses benefit from having an elegant design that reduces maintenance and extends their lifetime usability. A1 Fence LV can produce custom-designed dumpster enclosures that conform with Las Vegas city and county standards, meet all accessibility requirements, fire codes and even recycling requirements.

The company will continue to provide their signature fence installation, maintenance and repair services for commercial and residential customers in the coming months, and they will strive to do so without their customers having to experience a reduction in services. Within the valley, homeowners have multiple options when it comes to their fencing, ranging from concrete block to chain link, metal,

vinyl and wood and almost every other style imaginable. Their expertise is supported by the fact they have been in business for over 35 years.

Getting a quote for their custom designed dumpster enclosure and fencing services is as easy as calling them directly from their website (or using the handy form available on it) to make an inquiry. Their staff are available from 6:00 am through to 4:30 pm to speak with customers. No matter how big or small the project is, Maciel and his team will provide the same high quality work at affordable prices.

A1 Fence LV take their role to design, install and maintain fences very seriously. As a result, they are often sought out by those who want distinctive, secure fencing for their property. In particular, they tend to find themselves in high demand among homeowners with pools. With many working from home, now is the time to make sure pool enclosures are secure. With A1 Fence LV, customers know they will have secure fencing that can stand up to the intense Las Vegas weather.

Coincidentally, Maciel was quoted on the Fox News site earlier this year, stating, "Each year the National Safety Council reports heartbreaking statistics about unfortunate pool accidents. At A1 Fence LV, our goal is to help all homeowners enjoy their pool in a safe and sound manner. It doesn't matter whether we're fencing in an entire back yard or just the pool itself, we welcome any calls from homeowners looking to take steps to ensure safety around their pool."

Those who would like to learn more about A1 Fence LV can explore their website and make an inquiry (or request a free quote). The company advises that customers call first before coming to them as hours may differ due to COVID-19.
