

Beaumont California Pest & Termite Hires New Staff

September 15, 2020

Beaumont California Pest & Termite has been providing fast and effective pest control solutions to Riverside County for almost fifteen years now. The company is trusted as being the most affordable and the most reliable [pest control company](#) in this area. They have a team of ten pest exterminators who are all professionally trained on treating each and every species of pest in the area. They are more than prepared to handle any infestation they might be faced with.

The company is always looking for ways to grow in order to help as many people as possible. They recently hired a new employee in order to help more families and business owners. [Beaumont California Pest & Termite](#) announced on Wednesday that they hired Drake Wheeler to their team of exterminators. The president of the company announced, *"We have been trying to hire someone new to the team for a little while now and since we only hire the best of the best it has taken a little longer than usual but we finally found someone. Please help me welcome Drake Wheeler. Drake has a ton of experience in pest control and knows how to treat every pest on this side of the country. He has travelled all around the country and attended multiple pest control seminars and workshops. He is a hard worker and has a great can-do attitude."*

Beaumont California Pest & Termite also announced that they have witnessed more pest infestations this year than they normally record. A representative of the company talked a bit about why this is happening, *"More people are at risk of a pest infestation this year because the pests are able to multiply and spread without anyone controlling them. The reason for this is because people are using diy methods and over the counter products to attempt to treat infestations but these methods aren't as reliable as they used to be. These treatments simply do not work anymore. The pests have adapted and become immune to the chemicals in over the counter products so professional services that use industrial grade equipment are the only option."*

The company has a lot of great reviews for their services so if people think they have a pest invading their property they should try to contact Beaumont California Pest & Termite immediately. They can

be reached by phone or on their website at <http://beaumontcapest.com/>. Their hours are 8:30 a.m. to 5:30 p.m. on weekdays and from 8:30 a.m. to 12:30 p.m. on Saturdays. An employee of the company said, "*Pests spread very quickly so if people think they have a pest problem they should try to contact a professional asap.*"
