Delaware fence company now offering free estimates for all different fence types and uses

December 19, 2014

December 19, 2014 - PRESSADVANTAGE -
BEAR, Del. ? All American Fence Company, a provider of fencing installation and repair for residential and commercial projects, is now offering free estimates for all fence types and uses, including safety fences for dogs, landscaping fences, and privacy and security fences.

Materials and installation costs depend on several factors, so customers are encouraged to fill out an estimate repair form online or contact All American Fence by phone or email to discuss options.

All American Fence offers several fence types to choose from, including vinyl, aluminum, wood and chain link, as well as a large number of styles.

Considered a maintenance free option, vinyl fencing is constructed of polyvinyl chloride. It is available in a wide range of privacy, semi-private and picket styles, and most vinyl brands come with a limited lifetime warranty from the manufacturer.

The aluminum fences used by All American Fence are manufactured by Jerith. Constructed of a strong aluminum alloy, the fences are rust proof and will not crack or peel.

In addition to the various styles available in aluminum fences, including pool fencing, traditional wrought iron styles and industrial fencing, they also come in various heights and colors, like white, bronze and black. A lifetime warranty from Jerith comes with all fence styles.

Wood fencing allows for the most customization since clients are able to choose the style of fence, the type of wood used, as well as the height and color. Wood fences come in privacy, semi-private, picket, split rail, and post and rail styles. All American Fence offers several different woods, including red and white cedar, spruce and hemlock.

Specialty wood fence types that meet the codes for Historic New Castle, Del., are offered. They are

comprised of 1-inch spaced white cedar.

Chain link fencing is available in galvanized and extruded vinyl and is typically offered in various heights between 3 and 12 feet. It can be ordered in green, black, white or brown.

All American Fence also provides temporary fences for short and long term construction projects or other purposes. The fencing is made up of 6-foot-high panels of galvanized chain link supported by concrete bases. All American Fencing handles all delivery and removal responsibilities.

Fence repair services are also provided by All American Fencing. Homeowners with existing fences many times can save time and money by repairing the damage, as opposed to replacing the entire fence.

About All American Fence Company
