

Roof Restoration Experts Coolit Now Serving 7 Additional Queensland Towns

November 13, 2015

November 13, 2015 -

Queensland based roofing team, Coolit Roof Painting, has recently opened 7 new offices. The newest locations for the company are found in Bundaberg, Townsville, Harvey Bay, Brisbane, Sunshine Coast, Cairns, and Gold Coast. This is an advancement for the company, which has been working within the Roof Restoration industry for more than two decades.

The newest offices will offer the same services and high quality customer care which clients of the company have come to expect at the original locations in Rockhampton and Mackay. Services such as restoration, inspection, repairs, and high pressure roof cleaning are a few of the ways that company aids clients in maintaining one of the most important aspects of their homes. The team at Coolit has said the following regarding Roof Repairs in Australia: "With harsh weather conditions in Australia, it becomes essential for any homeowner to restore their roof. Since the roof is one of the biggest investments in your house, you must ensure that it is in its best form for optimal protection, neglecting small damages may require huge repairs later on and make you spend more. A damaged roof can also be dangerous for people living inside."

Another feature of roofing which the new companies will be focusing on includes whirlybirds. These are the

spinning silver devices attached to rooftops across Australia which aid in the even disbursement of hot air which can become trapped inside of the roof. The team explains: "Roof ventilators exhaust the hot air in the summertime from your roof cavity and the moist air in the cooler months. Here in Queensland we service Townsville, Rockhampton and Mackay. Not only do you reduced heat radiating down into your house but there can be savings with air conditioning."

Coolit Roof Painting also includes whirlybird installation and maintenance work in all of their new towns as well. The company invites all home and business owners seeking help with roof repairs, painting, cleaning, or more within Rockhampton, MacKay, Bundaberg, Townsville, Harvey Bay, Brisbane, Sunshine Coast, Cairns, or Gold Coast to contact them through their official online site. This will provide all customers with access to photo galleries of previous work, social media accounts held by the company, and plenty of information on roofing services.
