

Water Damage Restoration By Miami Restoration Team Claims It is Necessary Statistically For Number One U.S. Disaster

January 27, 2016

January 27, 2016 - PRESSADVANTAGE -

Miami FL: Miami Restoration Pro recently announced that water damage restoration is needed for incidents of floods, burst pipes, storms or other water-related causes. Statistics show that a one percent chance of an experiencing a 100-year flood is possible. Floods are the most common cause of Miami water damage, as well as the most frequent type of disaster annually in the United States. In 2012, there was \$7.7 billion worth of flood claims settled nationally. Ignoring leaks, cracks in the foundation and other symptoms of water damage can lead to much more significant damage to the entire structure.

The company says that calling upon the professionals at Miami Restoration Pro is the most likely way to take care of damage due to water. The experts use a step-by-step approach to quickly get the home or business dried out and the damage reversed. By using a systematic approach, the home or office can be recovered and restored to full service.

The steps which the professional team uses in restoring usability to a home or business begin with the removal of standing water. Water extraction machines can reach water in carpets and on floor surfaces to extract it. The flooring materials are then removed to ensure that there is no mold growth. Restoration of personal property may be possible even when the furniture, documents or machinery has been affected by the water. The technicians then remove airborne particles and eliminate mold, mildew, bacteria and other organic contaminants.

Whenever there is an uncontrolled flow of water, damage is possible. Permanent issues with the integrity of the structure are possible without the services of the Miami Restoration Pro. Prompt action and comprehensive services are the philosophy of the company's teams. By its very nature, water damage is an emergency situation, and the professional team responds quickly with the necessary equipment and tools to go to work quickly.
