Las Vegas Juvederm Non-Surgical Procedure Revolutionizes US Cosmetic Medicine Industry

January 28, 2016

January 28, 2016 -
Henderson NV: Las Vegas Juvederm doctor Garry Lee is pleased to announce that he offers anti-bruising technology which lifts wrinkles without the need for surgery or needles. The Botox doctor is able to inject and fill wrinkles without bruising or swelling of the skin. Cosmetic fillers such as Restylane, Juvederm and Radiesse have been used for years to fill facial wrinkles, but often resulted in bruising, pain and swelling, and for many patients, the trauma caused by bruising and swelling after the therapy was often overwhelming.

Dr. Lee says the new technique is simple. A pilot needed is used to make a microscopic opening through which a microcannula, a long thin tube with a blunt end, is introduced. The cosmetic filler is extruded through the small pore at the end of the microcannula. There is no sharp needle tip to tear blood vessels or tissue. Dr. Lee, internationally recognized as a microcannula expert, predicts the new technique will transform the techniques of every cosmetic professional in the U.S. Currently few physicians are experienced in the technique.

In 2015,Dr. Lee won the Aesthetic Award as The Best Facial Injectable Enhancement Physician in the US. This award represents the most prestigious competition nationally for clinical excellence among plastic surgeons, dermatologists and aesthetic physicians. In the 2015 World Competition for Best Non-Surgical Facial Rejuvenation, Dr. Lee led the United States to take second place. The competition featured top physicians from five continents at the Paris France Aesthetic and Anti-Aging Medicine European Congress.

The doctor is a lecturer for teaching physicians in the fields of Allergan (Botox & Juvederm), Galderma (Restylane), Air-Tite (MicroCannula), and Eclipse Aesthetics (MicroPen, PRP, & Skinfinity RF). In addition, he has published works internationally.

The spacious VIP clinic, Look Younger MD, was designed to incorporate the ancient Chinese art of Feng Shui. Previously known as Aestheque and the Horizon Ridge Wellness Clinic, it features ancient fossils, amethyst crystal water fountains and a tranquil and peaceful place of refuge.
