January 28, 2016 - PRESSADVANTAGE -

Koziel Family Chiropractic is a renowned chiropractic clinic serving the greater Indianapolis area. The clinic has now announced a new premium massage therapy service that has created a buzz in the area.

Serving the Beech Grove and greater Indianapolis area, Koziel Family Chiropractic is a clinic owned by Dr. Jake Koziel who is a renowned chiropractor. The clinic has been making a buzz locally for adding a new service to their establishment that has apparently set the bar high for their competitors. The service is said to be a premium massage therapy service that way not available locally up until introduced at the Koziel Family Chiropractic.

Koziel Family Chiropractic has been in the area for quite a while and claims to help people ?achieve their health and wellness goals? without the use of conventional medicine. The establishment is a network of chiropractic and wellness care professionals specializing in pain relief and pain prevention. A spokesperson for the clinic made an official statement in which he discussed the work of the clinic and the new premium massage therapy service.

?Here at Koziel Family Chiropractic, we have been catering to a large number of clients for many years in Beech Grove and the greater Indianapolis area. Our chiropractors specialize in all sorts of pain relief techniques, pain prevention and help people achieve their health and wellness goals. We have now added to our services in order to give our clients a new experience. The service has been great so far and the clients who have used it recommend it to others,? the spokesperson stated.

He further added about the new service, ?Our new service is a premium massage therapy service, unlike anything else in the area. The massage service is an addition to our Wellness Club here at the Koziel Family Chiropractic and we urge locals to try it in order to live a healthier, stress-free life.?

Details about the clinic and the new service can be seen on their official website at <http://kozielchiropractic.com/>.
