March 29, 2016 - PRESSADVANTAGE -

ZombieDisasterKits, a consumer product company based in Vancouver, Washington, has announced that BBQ Pit Boys has tested, approved, and now uses the company's QuickTemp Instant read digital thermometer for their meat recipes. Meanwhile, the company says that customers can now get the Quick Temp in three different places, on Amazon, on the BBQ Pit Boys site, or on Zombiedisasterkits.com.

Jillian Gregg, a spokesperson for the company states, "We couldn't be more thrilled that our thermometer is being honored by such an outstanding company. We hope to establish a long and mutually rewarding relationship."

Gregg states that those interested will find a number of BBQ recipes on the site, and that all of them can be used with the digital thermometer to ensure meats are cooked to a safe temperature. She says that the collaboration comes just in time for the grilling season.

The thermometer, which was recently only available on Shopify and the Amazon marketplace, provides an accurate, instant temperature reading in just three to six seconds. It features a safety probe that can be

snapped shut to disable the wand, to keep it from turning on accidentally, which the company states helps to save battery life.

"It's a great thermometer," states Gregg. "Our customers love it, and now customers of the Pit Boys will love it as well."

Gregg states that the company hopes this will be one of many collaborations with other companies in the future. The thermometer, which can be seen on Amazon.com, offers a number of benefits according to Zombie Disaster Kits, and is currently one of the company's biggest selling items.

BBQ Pit Boys provides a number of recipes and grilling ideas, many of which are customer favorites. They offer recipes on everything from steak and seafood to desserts and side dishes, and the company provides a number of items for purchase, one of which is now the digital thermometer by Zombie Disaster Kits.

Those interested in learning more about the thermometer can visit the company on their official website or on the Amazon marketplace. Grillers interested in recipes or finding the thermometer on the BBQ site can also visit their official website.
